

**Your best choice—an ICPI Certified
Concrete Paver Installer**

“After interviewing several paver installers we decided to hire an ICPI certified paver installer. His knowledge of paver installation was excellent, and his confidence and business-like manner made us feel we were getting the best value.”

Sheryl & Gary—Homeowners, Sterling, Virginia

Who Is ICPI?

Founded in 1993, the Interlocking Concrete Pavement Institute (ICPI) is the North American voice of the interlocking concrete pavement industry. Membership includes paver manufacturers, suppliers, distributors, contractors and design professionals. ICPI's mission is to increase the use of segmental concrete paving systems in North America through improved paver market awareness and installation.

For more information about interlocking concrete pavements or ICPI, visit icpi.org.

What is ICPI Certification?

The ICPI Concrete Paver Installer Certification program communicates industry established guidelines to contractors who build interlocking concrete patios, driveways, plazas, parking lots and streets.

Installers are instructed by ICPI certified instructors who have attended ICPI training and have years of industry experience.

What do Certified Concrete Paver Installers learn in the ICPI program?

- Material and labor estimating
- Sound business practices
- Job layout
- Use of labor-saving specialty tools
- Soil classification and compaction
- Base material selection and compaction
- Bedding and joint sand selection and installation
- Edge restraints
- Paver selection and installation
- Basic contract law
- Safety
- Maintenance and management
- Specialty applications and construction tips

Why should you choose a company with a certified installer?

Knowledge

ICPI Certified Concrete Paver Installers are industry professionals that recognize industry established guidelines, practices and advances applicable to the construction of interlocking concrete pavements.

Industry support

ICPI reinforces knowledge to certified installers through technical support and the latest industry information.

Assurance

You can be sure that a company with a certified installer on staff is dedicated to quality installation guidelines and on-going education.

Continuing education

The ICPI Level I Concrete Paver Installer Certification is valid for 5 years after which it may be renewed annually. ICPI recently introduced the ICPI Level II Concrete Paver Installer Certification Program that expands on the knowledge gained in the level I program. The advanced certification program teaches new skills in interlocking concrete pavement installation and addresses skills based knowledge required for specialty applications.

Why do consumers choose ICPI Certified Concrete Paver Installers?

Identifies the professionals

You want to do business with a professional company that knows industry guidelines. Certification identifies installers who know them.

Increases confidence

Knowing that an experienced, skilled company with certified employees on the job boosts your confidence in getting a high quality installation.

Investing wisely

You are investing in a low-maintenance, long-lasting pavement. Certified installers can help get the job done on time and the right way.

Installing smartly

Because you want to hire skilled practitioners and craftsmen to install the best pavement, you should receive the highest value and benefit from educated, certified installers.

The installer can verify certification by presenting a valid certificate or card from ICPI or you can check ICPI's online certified installer database at icpi.org.

More than 13,000 installers have been certified since 1996! Visit icpi.org for a list of ICPI Certified Concrete Paver Installers.
